EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claims 4,5 and 10 have been canceled.

Note: these claims are being canceled as being drawn to non-elected subject matter, the elected having been made without traverse in the paper filed 12/13/04.

Allowable Subject Matter

1. Claims 1-3,6-9 and 11 are allowed.
2. Claim 1 is a linking claim and is allowable. Accordingly, the restriction requirement as to the encompassed inventions is hereby withdrawn and claims 6-9 are no longer withdrawn from consideration since these claims depend from or otherwise include each of the limitations of an allowed linking claim.

In view of the above noted withdrawal of the restriction requirement as to the linked inventions, applicant(s) are

Art Unit: 2872

advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

3. The following is an examiner's statement of reasons for allowance: the prior art does not teach or suggest a lens system including the specific configuration for the solid immersion lens(SIL) and the meniscus lens wherein the concave surface of the meniscus lens is positioned about the SIL portion in spaced relation thereto as set forth in the claimed combination. In light of applicant's remarks and/or amendments in the paper filed 7/11/05, "an integrally molded together material" is being construed as requiring the SIL lens and body portions to be made of a single unitary material.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

Art Unit: 2872

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kino and Mifune both show SIL lens systems. Nomura shows a lens system including a meniscus type lens.
